

# LINKING MIGRATION, LAND DEGRADATION, AND LAND RESTORATION: POTENTIAL FOR SUSTAINABLE LIVELIHOODS.

**ENABLE**  
BUSINESS 4 LANDSCAPES

**31 May 2017 • 3.00 - 6.00 PM • Venue: Hotel Palácio, Estoril**

This event will illustrate connections between migration, climate change, land degradation and (business driven) landscape restoration. Connecting academic and practical knowledge from worldwide case studies will spark the debate on how to reverse the effects of climate change by large-scale landscape restoration, while providing people better livelihood and living conditions. Examples of sustainable land management, regenerative and climate smart agriculture are given to show the importance of a holistic approach and multi-stakeholder partnerships that render 4 returns: hope & inspiration, social capital, natural capital and financial capital.
